

LUCIA NOMATTER SHUMBA

Jersey City, NJ 07305 | (929) 769 7746 | lushumba@mail.yu.edu | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data science and analytics professional with 8+ years of experience in statistical modeling, risk analysis, advanced analytics, machine learning, and business intelligence solutions across large-scale environments; government, insurance, and international development. Advanced skills in Python, R, SQL, Tableau, and AWS, with strong capabilities in delivering insights for food security, health, environmental equity, financial risk management and performance optimization. Proven ability to translate complex data into executive-level insights that drive revenue growth, operational efficiency, and strategic decision-making. Currently pursuing MS in Data Analytics & Visualization in NYC.

EDUCATION

Yeshiva University, Katz School of Science and Health <i>Master of Science: Data Analytics & Visualizations</i>	New York, NY August 2026
Eastern Africa Statistical Training Centre <i>Master of Official Statistics: Specialized in Agricultural Statistics</i>	Dar es Salaam, Tanzania November 2023
Lupane State University <i>Bachelor of Social Science: Special Honors Degree in Monitoring & Evaluation</i>	Harare, Zimbabwe October 2020
University of Zimbabwe <i>Bachelor of Science: Honors Degree in Statistics</i>	Harare, Zimbabwe June 2016

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python (Pandas, NumPy, Matplotlib, Scikit-learn), R, SQL
ML & Stats: Regression, Classification, Time Series (ARIMA/ARDL), XGBoost, Ensemble Models, Clustering, A/B Testing
BI & Viz: Tableau, Power BI, Jupyter Notebook, GIS & Remote Sensing
Data Engineering: AWS (S3, Glue, Lambda, Athena, CloudFront), PostgreSQL, ETL Pipelines, Data Warehousing
Statistical Tools: STATA, SPSS, CSPro, Excel
Certifications: Data Analysis with Python – freeCodeCamp | [IBM Getting Started with Data](#) | [IBM Data Fundamentals](#) | SDMX Tools & Open SDG – UN Economic Commission for Africa / UN Statistics Division

WORK EXPERIENCE

Transatlantic Innovation Hub Inc. <i>Data & Product Design Intern</i>	New York, NY June 2026 – August 2026
- Collect, clean, and analyze data to inform product decisions across the Hub's analytics and product design workstreams; build dashboards and visualizations to communicate data-driven findings to cross-functional teams. - Source and organize multi-source datasets (60 hrs); prototype new product features including user research, wireframing, and iteration cycles (60 hrs); present analytical insights and recommendations to leadership. - Contribute to design reviews and participate in agile iteration cycles; apply classroom-acquired data analysis and product design skills to live, real-world projects.	
Zimbabwe National Statistics Agency, ZIMSTAT <i>Senior Statistician - Agriculture & Environment</i>	Harare, Zimbabwe December 2020 – January 2025
- Architected and executed end-to-end data pipelines integrating crop production, livestock, trade flows, and utilization data across a 9-year time series to produce Zimbabwe's first National Food Balance Sheet; adopted as Cabinet-level policy and cited in international SDG reporting. - Engineered the transition of annual Agriculture & Livestock Surveys from paper to a CAPI digital system nationwide, improving data accuracy, timeliness, and field traceability across all provinces. - Built automated data quality validation workflows for the 2022 National Census, reducing preliminary reporting time by 75%; applied STATA-based checks across large-scale provincial datasets. - Implemented SDMX and the National Open SDG Data Portal, delivering real-time machine-readable dashboards on 17 UN Sustainable Development Goal indicators for government and international stakeholders.	
Discovery Research Services, DRS <i>Research Administrator</i>	Harare, Zimbabwe August 2019 – November 2020
- Managed end-to-end data operations for a Gates Foundation-funded study, ensuring high-quality inputs for statistical analysis and strategic reporting. - Trained and coordinated field teams to streamline data acquisition and maintain integrity across distributed research sites. - Delivered client-ready reports with actionable insights, reinforcing stakeholder trust and informing future program design.	
THI Insurance <i>Data Analyst Graduate Trainee</i>	Harare, Zimbabwe September 2016 – July 2019
- Analyzed short-term insurance datasets to identify claims trends and perform risk assessments, demand forecasting, customer segmentation, CRM analytics and portfolio performance optimization enhancing data-driven risk management strategies. - Developed detailed reports on policy performance and financial outcomes, supporting decision-making processes with actionable insights. - Determined premium and claim amounts for tobacco (Hail and Wind) policies, applying rigorous data extraction and transformation techniques to ensure accurate pricing and risk coverage.	

SELECTED PROJECTS

Serverless ETL Data Pipeline & Analytics on AWS

AWSS3 · Glue · Lambda · Athena · CloudFront · Nuxt.js | Fall 2025

- Designed and deployed a production-grade serverless ETL pipeline processing e-commerce data from ingestion to visualization; delivered a globally distributed analytics dashboard with <5-second query performance via CloudFront CDN.

Machine Learning: Predicting U.S. Weekly Labor Supply

Python · scikit-learn · XGBoost · Jupyter | Fall 2025

- Built and benchmarked KNN, SVR, Decision Tree, XGBoost, and Ensemble Voting Regressor models on the UCI Census dataset to predict weekly work hours; produced a fully reproducible open-source notebook (GitHub).

Clima — Climate Data Ingestion Pipeline

Python · Data Ingestion · GitHub (data-ingestion branch) | In Progress

- Contributing to an open-source climate data platform on the data-ingestion branch; implementing automated pipelines to source, clean, and structure climate datasets for downstream analytics and visualization.

ZIMSTAT ADRMS — Automated Data Request Management System

Next.js · Vercel · SQL · GitHub | In Progress

- Built a full-stack Automated Data Request Management System (ADRMS) for Zimbabwe National Statistics Agency (ZIMSTAT); enables researchers and institutions to submit, track, and receive official statistics requests online across Agriculture, Demography, National Accounts, and Prices data categories; features a staff dashboard, DG approval workflow, and reference-number tracking, deployed on Vercel.
